

# CARE

## Extended Warranty

If you'd care for more protection, just ask me.

Since 1961, Toyota has led the way in South Africa with a uniquely caring approach that's as much a part of our culture as our renowned reputation for quality, durability and reliability. Driving your Toyota should be a satisfying experience even if you are nearing the end of its standard warranty.

The last thing we want you worrying about is the cost of covering yourself in the case of unforeseen mechanical repair expenses after your 3-year/100 000km warranty has expired.

This is why Toyota offers you an opportunity to extend your standard manufacturer's warranty to prolong your best ownership experience. ToyotaCare Extended Warranty is the only extended warranty that is backed by Toyota South Africa.

**ToyotaCare**

Unlike other warranties on the market, the ToyotaCare Extended Warranty is a genuine extension of the original manufacturer's warranty.

### The ToyotaCare Extended Warranty:

- Covers you against mechanical failure repairs after your existing warranty expires
- Provides you with Roadside Assistance
- Increases your vehicle's residual value
- Has no limit on components covered

### How long does the ToyotaCare Extended Warranty last?

The Extended Warranty provides cover of your vehicle's mechanical components for up to 6 years or 220 000km from the original date of vehicle purchase.

### What is covered by the ToyotaCare Extended Warranty?

Some examples of the major categories covered are, but not limited to:

Engine	Engine cooling
Fuel System	Alternator
Transmission	Regulator
Driveshafts & Axles	Starter & Solenoid
Bearings	Air Conditioning
Steering	Engine Management Systems
Brakes	Gaskets

### Eligibility: How do I qualify for a ToyotaCare Extended Warranty?

Our range of ToyotaCare Extended Warranty packages cater for all Toyota vehicles, new or used, which are younger than 6 years, and have no more than 220 000km on the odometer.

If the vehicle is still within the standard manufacturer's warranty period, an extension to 4 years/150 000km, 5 years/180 000km or 6 years/220 000km can be added to the existing warranty. If the standard manufacturer's warranty has elapsed, a 2 years/220 000km ToyotaCare Extended Warranty can be purchased.

### Do I have to get my car inspected before you will cover my vehicle?

If your vehicle is still under the standard manufacturer's warranty, the vehicle does not need to be inspected. However, if your vehicle's standard manufacturer's warranty has expired, and a ToyotaCare Extended Warranty has been purchased, the vehicle must be inspected by an authorised Toyota dealer prior to activation.
